

Biodegradable & plastic-free

TUBEX Nature

The TUBEX Nature growth sleeve is completely biodegradable and represents a real innovation in forestry. The growth sleeve supports young plants just as effectively as the well-known and long-proven TUBEX plastic growth sleeves.

100%

Biodegradable – no microplastics

∅ 5 years

shelf life in forest climate

Quality

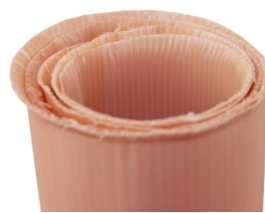

Complies with EN ISO 17556 standard for biodegradability

Ecologically safe

OECD 207 and 208

Patented ventilation system: for a microclimate in the growth cover

Nested inside each other: for optimal logistics and easy handling

Advantages

- Biodegradable in forest climate
- 100% plastic-free, but just as robust
- Made from natural raw materials
- Hardly any maintenance required

Particularly bright: optimal growth due to little shade

Biodegradable: resealable cable ties

Application

- in hard-to-reach areas
- Renaturation or reforestation projects
- Browsing protection
- Growth sleeve to support growth
